## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Advisor Class	\$81	0.79%

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Funds' lagging relative performance for the period was driven by both allocation and selection effect. From a sector perspective versus the S&P 500® Index, both Funds' overweight in Consumer Staples and Health Care, coupled with stock selection within those sectors, were large detractors to the relative performance. In addition, the Funds' underweight and stock selection within the Information Technology sector further negatively impacted relative performance.

While Coho's downside protection has been consistent throughout our 25-year history, the dominance of Growth and the narrowness of the market has negatively impacted our upside participation more recently. We continue to believe the market is mispricing risk and undervaluing the earnings, cash flow, and dividend growth potential of our portfolio. We are optimistic that a renewed focus on fundamentals and valuation will help to further close the performance gap and reinforce the pattern of returns we seek to deliver over the market cycle.

## HOW DID THE FUND PERFORM SINCE INCEPTION?\*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shares noted. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, management fees and other expenses were deducted.
